Für die Nutzung von Künstlicher Intelligenz (KI) in Prüfungs-, Transfer- und Studienleistungen

Anfrage an folgende KI* (inkl. Abrufdatum)	Grund für die Verwendung der KI	Bewertung der Qualität des KI-Outputs	Verwendete Software und Versionsnummer
https://dl.acm.org/doi/pdf/10.1145/3609025.3609477 What would be novel about applying these design patterns to a Rust code base (like a case study)? Are design patterns for functional languages actually an open research question?	discovery of research topics about design patterns in rust	valuable input on possible directions of research	gpt 4o
How much research already exists on this topic: "Applicability of different software design patterns to large scale user applications written in Rust"	identify research gap	interesting ideas for less researched areas, but needs more manual literature review to be sure	gpt 4o
How is this citation style called: [Heu25]	identify citation style	successfully identified as DIN alphanumerical style	gpt 5.2
Are there alternative standard catalogues besides ISO 25010 that I can choose quality criteria from?	find out multiple possible catalogues to choose the best fitting one	it turns out ISO 25010 is already well suited	gpt 5.2
List more quantitative criteria I can use to assess code quality in Rust	gather ideas for more metrics	poor quality; some metrics are made up by the LLM, and some are not suitable for Rust	gpt 5.2
Where can I find the book "Refactoring" from Martin Fowler?	find original source	hinted to the original publisher, which helped find the book	gpt 5.2
What is the original paper that defines maintainability index?	find original source	listed multiple canonical papers for the MI that can be explored	gpt 5.2
Name papers where design patterns are evaluated using quality criteria	find related work	a good starting point for literature review and related work section, but more papers should be identified through google scholar etc.	gpt 5.2

*Bitte formulieren Sie Ihre Anfrage und nennen Sie die verwendete KI
